ABOUT ME

QA engineer with 15 years of experience and quality-first mindset. My goal is to help teams succeed in improving their testing efforts. Thrive in fast-paced environments by optimising and streamlining processes.

CORE SKILLS

- Test automation
- Web / Mobile testing
- API testing
- Appium / Selenium
- Cucumber
- JUnit / TestNG
- AssertJ / Kotest
- REST Assured / Postman
- Kotlin / Java
- Spring Boot
- Gradle / Maven
- BrowserStack
- Jenkins / TeamCity
- IntelliJ / Eclipse
- Splunk
- Git / Github
- TestRail / Zephyr
- Agile / Scrum
- BDD / TDD
- Jira / Confluence

STRENGTHS

- The ability to break seemingly difficult problems down into small, actionable tasks
- Effectively conveying best practices and concepts with hands-on examples in workshops
- Taking ownership to drive successful outcomes
- Using engineering skills to create utility tools that reduce repetition and simplify work

ISTQB CERTIFICATIONS

2014 - Advanced Level - Technical Test Analyst

2010 - Foundation Level

EDUCATION

2010 - Master of Science (MSc) - Technical Informatics, University of Szeged

WORK EXPERIENCE

Senior Test Engineer - PayPal

Stockholm, Sweden | Apr 2017 - Present

- Design and implement automation solutions using Selenium, Appium and REST-assured with abstractions
- Conduct trainings to improve the coding skills of fellow QA:s
- Test, release and monitor our Android OS on Terminal hardware
- Use lab-days and hack weeks to experiment with new ideas and approaches to ease our software testing efforts
- Improve and maintain CI and card payment robot (Abrantix)
- Test hardwares, regression and feature test card reader softwares
- Test releases of our POS apps and SDK:s on both Android and iOS
- Create and maintain test cases and build knowledge base
- Review code and provide feedbacks

Test Manager & System Developer

Stockholm, Sweden | Apr 2015 - Apr 2017

- Was responsible for leading continuous improvement in quality
- Worked on various responsive, adaptive and mobile websites as well as native app projects
- Developed test automation for native Android apps
- Planned and executed usability and exploratory tests on mobile devices

Software Test Engineer

Budapest, Hungary | Jan 2015 - Mar 2015

- Updated head units of cars with truck navigation softwares
- Performed regression and stress tests manually and with custom scripts
- Reproduced customer bugs and verified bug fixes
- Field tested the system in real life situations and recorded logs, observations for further analysis

Software Test Automation Engineer

Szeged, Hungary | Sep 2010 - Dec 2014

- Developed automation frameworks and scripts in Java for functional, regression, multithread and deployment testing
- Implemented features and fixed bugs in production code
- Planned and executed test cases
- Implemented service monitoring and alerting
- Reviewed design papers, codebase and test documents
